

# DIDSBURY PIONEER

VOL. XXVII, No 26

DIDSBURY, ALBERTA, THURSDAY, JUNE 26, 1930

\$2.00 per Year. 5 cents a copy

## COMMUNITY PICNIC WILL BE HELD ON DOMINION DAY.

Arrangements have all been made to make this year's Community Picnic the best picnic yet held and everything will be ready to take care of a big crowd.

At 10-30 a.m., the games will be opened with Dodge-ball. There will be Softball and Horseshoe tournaments and the sports will include novelty race, cycle race, climbing the greasy pole, chasing the greasy pig, potato races, egg and spoon races, three-legged race, wheel-barrow race, sack race and all kinds of races for the children.

For the Softball tournament, teams from Westerdale, Elton, Westcott and Liesemer's team from Didsbury have entered and any other country teams who wish to enter should communicate with Mr. H. Liesemer.

Free ice cream tickets will be given at the main gate to all school children and lemonade and coffee will also be provided free.

No admission will be charged but all are invited to bring baskets and cups.

There will be a refreshment booth on the grounds.

The following committees will be in charge—

Sports: H. Liesemer, C. E. Reiber, J. V. Berscht, J. E. Gooder. Refreshments: G. Julien, J. Kirby, E. G. Ranton, J. W. Phillipson.

Booth committee: E. J. C. Gooder, Ward Keith, Bill McFarquhar, Bert Cressman, Ormand Phillipson, F. Moyle, L. Berscht.

Mr. Sharpe informs us that he has been particularly fortunate in booking films for the next few weeks. All the pictures to be shown for the next five weeks will be specials and will be shown at the regular prices.

## Murray, New Principal At Agrarian School, Olds

Professor James Murray, Provincial Government agricultural agent at Medicine Hat, has been appointed principal of the Olds School of Agriculture in succession to Frank S. Grisdale, M.L.A., who resigned the post to contest the Olds riding in the provincial general election, according to an announcement on Monday by Hon. George Hoadley, Minister of Agriculture and Health.

A successor to Professor Murray as agricultural agent will be made in the near future.

Professor Murray will take over his new duties immediately, as there is much work to be done preparatory to the opening of the autumn term of the School.

The new principal is one of the Dominion's outstanding agriculturists. He graduated from the Ontario Agricultural College, Guelph, in 1903 and for two years served on the staff of the Dominion Seed Branch. Two years more were spent on the staff of the Saskatchewan Department of Agriculture as superintendent of fairs and institutes.

For three years he was superintendent of the Brandon experimental farm. He then went east and was Professor of Agronomy on the staff of Macdonald College, Ste. Anne de Bellevue. He then accepted the post of manager of the Noble Foundation Company and other large farms, after which he was appointed Alberta agricultural agent at Medicine Hat, which post he has held for the last seven years.

Mr. Ross Ford was a visitor to the southern city last week-end.

## LOCAL & GENERAL

Mr. Bob Munson of Vulcan, spent the week-end with Mr. Gene Axtell.

Innisfail baseball team will make their last appearance on the local diamond on Monday, June 30th.

Mr. D. Irwin made a trip to Red Deer on Saturday, in the interests of federal affairs and on behalf of Mr. George Burns who was unable to attend.

A. W. Watson of the Royal Bank, Bowden was here, visiting his parents and Mrs. Watson who has been ill for some time. We are pleased to report that Mrs. Watson is improving very nicely.

The Lunch and Food Sale given by the W.A. of St. Cyprian's, was very successful, considering the bad condition of the roads. The ladies netted a neat little sum for their funds.

Owing to July 1st coming on a Tuesday this year, the Pioneer would esteem it a favor if the advertisers would prepare their copy earlier than usual. Those who have news items are asked to co-operate also.

The U.F.A. Federal Convention to select a candidate for the coming election, will be held at Olds on July 5th, immediately following the School of Co-operation which is to be held at Olds, July 2nd, 3rd and 4th. Everyone interested, should attend.

A Boxing bout will be staged at the Opera House on Saturday night when thirty-one rounds of boxing are advertised. The main event is a ten-round bout between Flood and Befus. These boys have met before and have always put up a good scrap.

A special meeting of Didsbury Rebekahs was held on Friday night. Visitors were expected from Crossfield but the heavy rain prevented them from attending. After the meeting, a "bridal shower" was given to two of the members, Mrs. Nyle Hunsperger and Miss Bessie Clemens. At the close of the meeting, refreshments were served.

The Liberal Convention for the Red Deer constituency was held at Innisfail on Tuesday, but no candidate was chosen to contest this division at the forthcoming election. The question as to the advisability of bringing out a candidate, was left to the executive committee. Mr. and Mrs. H. E. Reiber and Mr. and Mrs. John Liesemer attended the convention from Didsbury.

## ANNOUNCEMENT

I desire to express my appreciation and gratitude for the hearty co-operation and support accorded me in the recent campaign.

W. A. AUSTIN.

## Didsbury Annual Fair, July 29th and 30th

The Didsbury Annual Exhibition and Fair will be a two-day event this year. The prize list has now been issued and may be obtained from the secretary, Mr. C. E. Reiber.

The farmers of the district have always taken a keen interest in the fair and it is expected that a larger number of entries will be made than in previous years.

The secretary is arranging for midway attractions and a program of sports is being scheduled for the second day.

Entries for the exhibition close on Saturday, July 26th at 10 p.m.

## Fifth Fortnightly Crop Report

Issued by the Department of Agriculture, Government of Alberta, Edmonton, June 21st, 1930.

Reports received from south of Calgary indicate that during the past fortnight, several windy days with high temperature have checked growth, which up to that time had been very satisfactory. Summer-fallow had been standing up well but crops sown on spring plowing were beginning to suffer. Little or no rain had fallen during this period but reports of rains over a large area on the night of June 20th creates a much-improved crop prospect. Irrigation has been generally practiced throughout the irrigated areas.

In the central and eastern part of the Province, rains within the past few days have done much to relieve the serious condition caused by continued dry weather and high winds. Estimates place the damage from winds and cutworms as high as 40 per cent. Much of this land has been reseeded but in some cases this was impossible owing to the difficulty in securing seed. The western and northern areas have abundant moisture and their greatest need is for warm weather. Along the C.N.R. lines eastward of Edmonton and north of them, heavy rains have fallen. St. Paul reports five inches since 1st June and Vermillion 3.91 from 10th to 13th June. The Peace River district continues to have abundant moisture with slight damage from floods in the eastern part. Insect injury, particularly from cutworms, is greater than usual, otherwise, crop conditions are favorable.

Hay and pasture crops are reported to be doing well except in the areas which have suffered so severely from high winds and lack of moisture.

## Result of Polling in Didsbury Riding.

The following are the results of the polling in the Didsbury Constituency when A. B. Claypool was elected over W. A. Austin.

## Reception Tendered Rev. and Mrs. Roppel.

The members and friends of the Evangelical church gave their pastor and wife a happy surprise at their home on Monday evening, June 23. The reception was in honor of Rev. and Mrs. Roppel's return to Didsbury for the sixth year.

Addresses were given by Mr. D. Dippel and Mr. H. Reiber in which sentiments were voiced of the congregation and Sunday School in welcoming their pastor. In an informal way a purse was handed to Mrs. Roppel for her services as organist in the past, for which she thanked them.

Readings were given by Mrs. Cunningham and Mrs. Gabel. The music numbers by Miss Laura Liesemer were much enjoyed. A solo was rendered by Mr. Gabel and a duet by Mr. and Mrs. Berscht.

A very fitting reply was made by Rev. Roppel in which he expressed his hearty appreciation in this gathering etc. All sang "Blest be the tie that binds" after which lunch was served.

Mr. Bill McFarquhar was a business visitor to Calgary on Wednesday.

## Keeping Pace With Progress

Are we keeping pace with progress?

Progress is an illusory thing. It may be seen, but so often is not perceived. Like old age or a thief in the night, it creeps upon one unawares and suddenly one awakens to realization that some profound change has taken place, an evolution has occurred. We have not been aware of the fact because of its apparent insidiousness—because its movement towards and past us has been gradual. We have seen it unconsciously but it has been too close to us for observation.

Yet despite this seeming slow approach the thing that we call progress moves with great rapidity, but it moves continually, inexorably, a step at a time, but never halting. It is an onward march that never tires, never falters.

The only way to correctly gauge progress is in retrospect. Look back a few years, only a decade or so, and the remarkable progress which civilization makes in the course of a brief span suddenly becomes apparent with startling clarity. Yet we do not see these extraordinary and far reaching changes in the making although they are going on all the time.

Turn over the leaves of the family album and immediately the truth of the assertion stares one in the face. What an extraordinary change in style of dress, in shape of headgear, in fashion of hair dressing in a few years. It appears incredible that one really looked like that 20, 15 or even ten years ago.

But progress does not mark a changing trend in dress alone. It invades every realm of activity within the ken of human experience. In the whole field of things material and in the entire mental and even spiritual arena, a steady and unrelenting advance is being made.

Hark back but twenty years and compare the means of transportation of that time with the swift cabin monoplane and upholstered limousine of today. Contrast the crude telephone of a generation ago with the automatic and the radio of the present time. Appraise the difference between the mixed prairie trail of yesteryear with the broad gravelled highway along which we roll now.

A little reflection shows that everything with which we come in contact, everything we experience, everything we do has been subject to just as remarkable an evolution as those things to which specific reference has been made. Not only has progress made radical changes in what we wear and how we travel in a few short years, but it has wrought a similar transformation in what we eat and drink, in our amusements, in our work, in our social life, in our worship and even in what we think.

In no sphere of activity, however, has this evolution been more marked in recent years as in the field of daily work, in the realm of business, in city and country. In methods of production, in modes of distribution, in processes of marketing changes have revolutionized and are continuing to revolutionize the daily life of the individual. These changes are so pronounced and so rapid that they are apparent even to the most careless onlooker.

A writer in a popular magazine recently pointed out that such swift changes are being made in the conduct of business and commerce that heads of business houses are finding it increasingly difficult to secure young men competent to engage in commercial life without first being re-trained after they have left college. The almost daily application of new scientific discoveries in the field of business results in the college student being out of date because the course, though designed for the particular vocation he intends to follow, has not kept pace with the changes taking place in the practical arena.

This evolutionary process is going on in the whole industrial field, agriculture included, but as was stated at the outset it is not always so easy to perceive it because of its constancy and its proximity.

For this reason it is perhaps a wise thing, nay, a necessary thing to sometimes pause and look back a little, make a few comparisons with the past and in the light of these contrasts a clearer perspective may be gained of what is happening from day to day, and perhaps even an inkling may be secured of what may be expected in future.

Only by doing this can we secure the necessary vision to enable us to keep pace with progress.

## USES PINKHAM MEDICINES

Praises Vegetable  
Compound, Blood  
Medicine and Liver Pills

Birchtown, Quebec—"I live 13 miles from town on a farm, with all my home duties and churning to attend to. At the Change of Life, I became nervous and run-down. The Vegetable Compound helped my whole system. My nerves are better, my appetite is good and I am able to do my work. I have also taken the Blood Medicine and the Liver Pills and they helped me. I will answer letters from women asking about your medicines."—Mrs. RICHARD CHARLTON, Birchtown, Quebec.

W. N. U. 1840

### Engineer Will Survey Mines

Government Official To Visit All  
Important Centres During  
Season

Hon. Charles Stewart, Minister of the Interior, has announced that Supervisory Mining Engineer C. C. Ross was leaving for Fort Smith. Mr. Ross will visit all the important centres of mining activity throughout the season. He will organize the work of the office and the field parties and endeavor to ascertain the needs of the prospectors and companies. Mr. Ross will then be in a position to advise the Minister of the Interior fully on all that appertains to the future of the industry.

## WAS RUN DOWN NOW WELL AGAIN

Takes Pleasure In Recommending  
Dr. Williams' Pink Pills

To the woman in the home illness is almost a calamity. Many a woman keeps on with her household duties when she is feeling ready to drop. Her head aches, she is easily tired, is depressed and nervous and has no appetite. In a word she is anaemic and badly needs help—the health-help that only Dr. Williams' Pink Pills can give her. These pills make rich, red blood which brings new strength and energy to weak, despondent sufferers. Concerning them, Mrs. Paul Rail, Coin du Blanc, Que., says: "I was badly run-down, slept poorly, and awoke as tired as when I went to bed. My appetite was poor and I felt miserable. I took six boxes of Dr. Williams' Pink Pills and they completely renewed my health."

Dr. Williams' Pink Pills are sold by all medicine dealers or by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

### New Flags For Old

Fifteen Nations Have Made Change  
Since World War

Fifteen nations, containing more than one-third of the world's population, are living under new flags since the World War. In addition a new flag of red, white and green is now flying in India, with its 300,000,000 people, where Gandhi's revolutionists have proclaimed independence of Great Britain. In fact since the change of colors by Russia, Germany, China and other great political divisions the probability is that not more than four flags of major nations can be universally identified today.

**Attacked By Asthma.** The first fearful sensation is of suffocation, which hour by hour becomes more desperate and hopeless. To such a case the relief afforded by Dr. J. D. Kellogg's Asthma Remedy seems nothing less than miraculous. Its help is quickly apparent and soon the dreadful attack is mastered. The asthmatic who has found out the dependability of this sterling remedy will never be without it. It is sold everywhere.

### Plants Large Forest Area

A forest in the embryo—250 acres of it—has been planted by the Saskatchewan forestry service, in the Prince Albert region. H. P. Eisler, forestry engineer, stated that the transplanting of 2,000,000 nursery seedlings and stock is the largest such programme in the province's history. Most of the seedlings are jack and white pine.

Spare the children from suffering from worms by using Miller's Worm Powders, a most effective vermifuge with which to combat these insidious foes of the young and helpless. It is an excellent worm destroyer, and when its qualities become known in a household no other will be used. The medicine acts by itself, requiring no purgative to assist it, and so thoroughly that nothing more is desired.

### Increase In Grape Growing

The development in grape growing by J. W. Hughes, of Kelowna, furnishes some interesting data. In 1927, he had 500 baskets, in 1928, 2,500 baskets, in 1929, 20,000, and this year he expects 40,000. A winery is offering \$100 a ton for "concord."

## Let's Go Fishing

But not forget to take Minard's along. It will take care of cuts, bruises or mosquito bites.

**MINARD'S**  
"KING OF PAIN"  
**LINIMENT**

### Investments Along the National Show Increase

Over Seventy-Four Million Involved  
In Establishing Industrial Plants

New industrial plants established along the lines of the Canadian National Railways, in 1929, involved a total capital investment by the industries of \$74,106,10, according to the annual report of William Phillips, manager of the Industrial Department of the system. This was an increase of \$696,300 over the previous year, when the expenditure was \$73,409,800. Additions to plants already existing represent an investment of \$33,361,000, an increase of \$8,792,200 over 1928. On the Grand Trunk Western lines of the system, the capital investment by industry for new plants and branches totalled \$11,729,000. While this was a decrease of \$7,500,400, there was an increase of \$2,227,000 in additions to plants, the total being \$11,563,000.

Canadian development from Atlantic to Pacific, Mr. Phillips indicates, was in many fields, involving such industries as: newsprint, cold storage, warehousing, grain elevators, silk mills, canning plants, foundries, distilleries, automobile plants, lumbering and mining industries. The most outstanding developments in Western Canada were in mining in Manitoba, and in cold storage plants in British Columbia. The Hudson Bay Mining and Smelting Company, and the Sherritt-Gordon Mines, Ltd., at Flin Flon, and Sherridon, expended \$10,000,000, while two cold storage plants, costing more than \$3,000,000, were established at New Westminster and Victoria, B.C. New elevators in the west represented an investment of \$1,345,600 and new oil warehouses, \$482,000.

Wise mothers who know the virtues of Mother Graves' Worm Exterminator always have it at hand, because it proves its value.

### The Practical Way

They have a practical way of doing things in the west, says the Toronto Globe. For instance, the Saskatchewan Department of Agriculture has bought a farm "absolutely polluted with weeds," and will proceed to make it blossom as the rose. A demonstration of this kind will be worth a thousand lectures on the best way to get rid of noxious growths on the farm.

Minard's for Insect Bites.

### Dairying and Mining

The annual value of Canadian dairy products—\$297,625,000—is a few million dollars less than the annual value of the mineral production of the Dominion. A total of 286,000 farmers supplied milk and cream to the 2,833 dairy factories throughout the Dominion last year.

You will sleep more soundly than ever before in your cosy Third Class stateroom on a Canadian Cunard ship. Soft mattresses, spotless linen, warm blankets, feather pillows, bedspreads, clean towels, large mirror and washstand, plenty of soap and water, cleanliness everywhere... and trained stewards to wait on you.

All this is part of Third Class service on this famous line. This service means that you eat, sleep and play as you never did before, on the voyage over and back.

Make sure you are going to enjoy the trip by sailing Cunard to the Old Country.

HUNTER-MARTIN & CO., REGINA, SASK.

## Former French Premier Has Great Faith In The Future Of Aeronautics

Giant trans-Atlantic aeroplane hurtling through dizzy altitudes at terrific speeds, the passengers breathing oxygen supplied from special tanks, will soon make Paris less than 10 hours from New York, M. Paul Painleve, former premier of France, told the United Press.

"Perhaps I shall live to see the day," said the 67-year-old former premier, "when these specially constructed planes will roar through the thin air at altitudes above 32,000 feet at speeds surpassing 300 and 400 miles an hour.

"When the technical problems for the construction of these high-altitude, speed airboats are solved, then will trans-Atlantic air service become a reality. Lindbergh's solo flight stimulated the solution of these difficulties and perhaps before I die, aeroplanes speeding at 300 and 400 miles an hour high above both clouds, rain and tricky air currents will link Paris with North America."

Seated at his desk, littered with mathematical treatises and scientific manuscripts, M. Painleve waved his hands at the bookcases which covered the walls from floor to ceiling of his study.

"In 1902 when I was well along in my study of those books and was beginning to do a little mathematical thinking myself, I convinced myself that heavier-than-air flight was possible. Six years later Orville and Wilbur Wright came to France with their crazy air-machine. I knew it would fly, and it did. My six-year-old dream had come true and since then I have never lost my faith in aviation.

"Three years ago Lindbergh landed at Le Bourget. His flight was just as important as the first trial I made with Wilbur Wright in 1908. The one proved the plane was feasible, the other demonstrated it was the world's best means of rapid transportation. Lindbergh set the best aviation experts of the world studying means of perfecting aeroplane motors and equipment. The Wright Brothers, Bleriot and Lindbergh are a trio of names upon which aviation history stands."

The famous mathematician-politician declared there are only two certain methods of conquering the Atlantic by air. The first is by developing machines to fly in extreme altitudes, thus lessening resistance, increasing speed, and decreasing danger through atmospheric conditions, and the second is to establish floating islands for use with present-type of aeroplanes.

Although Painleve said he believed floating landing fields were feasible, he thought the future of aviation rested in flying high at terrific speeds. The machine would have to be constructed in such a manner to resist the unequal pressure, and both passengers and crew would have to be supplied with oxygen to breathe at such dizzy altitudes.

Six times M. Painleve has been minister of war, and yet he is not convinced that the aeroplane is the most formidable unit for use in the next war, which Painleve hopes will never come for at heart he is an ardent pacifist.

"Aeroplanes have their use in war," he said, "but they will not be so dangerous as many people like to

believe. New anti-aircraft guns are being perfected which will make the average airman in the next war feel like a partridge under bombardment from a thousand shot-guns. No, the plane is more interesting to me for its commercial value."

### One Way To Count Cost

#### Expenditure In Great War Would Have Built Many Garden Cities

The League of Nations reports the cost of the Great War at \$363,000,000,000 and 37,000,000 lives—that is four times the total population of Canada, not merely of lives, but lives of selected men, competent in virtue of admirable qualities to meet the most terrible responsibilities that an imperfect civilization can place upon men. The cost in money would have built 181,500 garden cities, where the evils of congested living, the sordidness, the ugliness and the despair that breeds resentment, anger, broken homes, ill-bred children, crime and disease would have had no seed bed for growth.

### Winnipeg Newspaper Union

(By Annebelle Worthington).

Here is a cute model for classroom for the little sub-deb who admires snappy clothes that are simple and smart.

It is navy blue wool crepe printed in dark and vivid red tones and belted at normal waistline with plain red in the dark shade of grosgrain ribbon. The collarless neckline is softened by self-fabric bow tie.

It is moulded through the waist and hips with slight blousing above belt with new flared fullness introduced in skirt through soft gathered flounce with upward tendency at front.

This attractive style No. 3248 comes in sizes 8, 10, 12 and 14 years. For the girl of 8 years, it can be copied exactly with 1 1/2 yards of 39-inch material and grosgrain ribbon belt.

There are many other fabrics equally fashionable and suitable as crepe de chine, wool challis prints, rayon crepe and wool jersey.

Pattern price 25 cents. Be sure to fill in size of pattern. Address Pattern Department.

### Poultry From E.P. Ranch

#### Prince Of Wales Will Exhibit At World's Congress

Birds from the ranch of H.R.H. the Prince of Wales, at Pekisko, near High River, Alberta, will be among the many interesting exhibits at the World's Poultry Congress, to be held at the Crystal Palace, London, England, July 22 to July 28, 1930. Another exhibit that is likely to attract attention will be the birds from the royal aviary at Windsor Castle. Canada has a particular interest in this aviary for among the birds are some Canadian Barred Rock presented to His Majesty, King George V. by the Canadian Government following the second World's Poultry Congress, at Barcelona, Spain, in 1924. This trio was the finest that could be procured in Canada. An exhibit of 1,000 birds is being sent to the World's Poultry Congress from Canada.

### People Make Living From Watercress Beds

#### Plant Grows In Profusion In Picturesque English Village

Motoring between Henley and Nettled recently, says a writer in the London Evening News, I came for the first time upon "Watercress Village." It must be unique in England. Its name is Ewelme, pronounced Yewelm. A stream as clear as crystal runs down the middle of the village street, and watercress grows in profusion in it. Rustic bridges cross the stream and lead up to the cottage gardens. Further broad expanses of watercress beds lie beyond the cottages, and the occupants make a living from watercress.

Some specimens of the California fan palm reach an age of 200 years.

## Provinces Need Aid Of Federal Government To Build National Highway

### Annual Agricultural Statistics

#### Every Farmer Asked To Fill In and Return Schedule

It is the custom of the Dominion Bureau of Statistics to co-operate with the nine provinces in taking a Dominion-wide census of important agricultural facts in June of each year.

The census takes the form of a simple cardboard schedule, distributed to individual farmers through the medium of the rural school teachers and pupils in seven provinces, and in Ontario and British Columbia through the rural postal offices. The essential object is to reach every farmer and to encourage as many as possible to fill in and return the schedule.

The two main phases of farm production—the areas of field crops and the numbers of live stock—are covered by the form. The areas of field crops determined from the schedules are combined later in the season with the estimated average yields per acre to determine the total yield for the country. In the case of wheat, particularly, the importance of having correct estimates of acreage is thus made apparent. Although there are many estimates of anticipated production, most of these are based on the one official acreage estimate, which has been issued annually since 1917, by the Dominion Bureau of Statistics.

It is unnecessary to emphasize the value of a wide sample to the attainment of accurate statistics, and it is our hope to obtain a completed schedule from the great majority of Canadian farmers. The more numerous the returns received, the more reliable will be the estimates compiled from them. Much of Canadian economic enterprise depends to some degree on correct estimates of agricultural production in the making of their plans.

If any farmer does not receive the cardboard schedule by the middle of June, he should apply to the school teacher of the nearest rural school, to his provincial Department of Agriculture, or to the Dominion Statistician, at Ottawa. Letters addressed to the Dominion Statistician require no postage.

### An All Canadian Firm

The Beatty Brothers factory at Fergus, Ontario, has made a record shipment of laundry equipment sets—some 8,000 of them—over Canadian Pacific lines for various destinations. It is pointed out that every item of the equipment was made in Canada and every official and employee of the company is Canadian.

### SAIL INLAND OCEANS

Passenger service on the Great Lakes is now opened for the summer season, and the three fine vessels of the Canadian Pacific fleet on these waters, S.S. Assiniboia, S.S. Keewatin and S.S. Manitoba, are now at the disposal of the public. Travellers wishing to vary the railway trip between Toronto and Winnipeg, are now able to make a pleasant change by taking ship at Port McNicoll and passing through Lakes Huron and Superior, via Sault Ste. Marie, to Port Arthur and Fort William. At the latter point they tranship to the Canadian Pacific trans-continental train and continue their journey to Winnipeg and the coast. Lay-out shows S.S. Assiniboia, a fine vessel of 3,880 tons, and having accommodation for 260 first-class passengers, and sketchmap of Great Lakes route.

A complete trans-continental highway in Canada may be a somewhat remote goal, but it is worthy of observation that it is now engaging the attention of Members of Parliament from one end of the country to the other. In the recent debate on the subject such parliamentary leaders as Hon. Dr. Manion, Hon. Charles Stewart, Hon. Hugh Guthrie, Hon. Charles Dunning, the Prime Minister, Hon. R. B. Bennett, Mr. Woodsworth and others indicated an increasing concern for the scheme. In connection with the matter, Dr. Manion supplied the interesting information that there remains only some 330 miles of highway yet to be constructed, and he advanced the argument that as this was through unproductive provincial territory, it might well be expected that the Dominion would contribute towards the construction of it. One of the strongest arguments in favor of the project advanced in the House of Commons was that there is no national highway communication above the head of the Great Lakes and that transportation by motor must be through a foreign country. A year ago Mr. King estimated the cost of a national trans-continental highway at 200 million dollars, but Dr. Manion suggests that the link above the Lakes might be completed for 5 or 6 millions. His suggestion that the Dominion might very well co-operate with Ontario regarding the cost seems not unreasonable. Dr. Manion put the matter in this way: "There is this to remember regarding the building of national and provincial highways, that the provinces are in perhaps a rather difficult position to undertake alone the building of a national highway. Take, for instance, across the northern section of Ontario extending from Sudbury to the Manitoba boundary, an area nearly as large as Germany and France put together, with a population of only 200,000. This sparse population requires branch roads and a large amount of money is being expended in the construction of branch colonization and settlers roads. Therefore the provincial government should not be expected to build the whole of this national highway across that section of Northern Ontario. That, after all, is the only section remaining to link up these different roads which could be, for the time being at least, turned into a trans-Canada or a Canadian national highway. Therefore, because of the demands of the province, it is particularly necessary, if the road is to be built, that the Dominion Government should take part in the work. The Dominion Government should also take part in this road-building from the national aspect of linking up the east and the west."

### Will Be Well Represented

Fifty-five cities in the United States and Canada will be represented at the fourth World's Poultry Congress which has been organized by the Governments of Great Britain and Northern Ireland, and a large number of the attending poultrymen will sail on the Canadian Pacific liner "Duchess of York" from Montreal on July 12, headed for the Crystal Palace, London, where the Congress will take place, from July 22-30.

A Navajo squaw would not think of making a perfect rug, for tradition says that blindness would follow such a deed.

"Why didn't I see you in school this morning?"  
"Because I wasn't there." — Montague, Charlerol.

"Mary, I see you have drunk all my brandy."

"Yes, sir, to get over my shock."

"What shock?"

"I broke the large mirror in the drawing room." — Paiges Gaies, Yverdon.

**THE LAST MONTH OF SCHOOL**

The following valuable hints for mothers should be made note of as the pressure of examination time draws near. Failure to pass exams is often the result of poor health, a fatigued mind in a depleted body. Do not let the boys and girls burn the candle at both ends or a nervous breakdown will be the result.

**How to Pass Exams.**—Keep the child's energy up to par by special attention to his diet. Begin each day with a substantial breakfast of fruit, cereal, milk or cocoa, and toast, also the occasional egg.

Rest periods are important and of real value after the noon lunch and before the evening meal. A happy unworried mental attitude is essential when settling down to homework. Cultivate confidence in the child's mind and courage to tackle his problems.

A quiet place to study and a peaceful, sympathetic atmosphere at home will give the best environment. See that supper is a good meal of satisfying and lasting quality. Lastly, sleep long, with the windows open, going early to bed every night for the month of June.

In short, see that your child follows the teachings of the Junior Red Cross Health Rules if you would have him up to the mark.

A copy of these rules and literature on Food for the Family, free on request from the Canadian Red Cross Society, 407 Civic Block, Edmonton.

**EXCLUSIVE CANADIAN**

Canada is the only country in the world so far to require the quality of canned goods to be clearly marked on the label so that the housewife can buy with the assurance that she is getting what she wants. Under the provisions of the Meat and Canned Foods Act, administered by the Fruit Branch of the Dominion Department of Agriculture, there are four quality grades, "Fancy," "Choice," "Standard" and "Second." "Always buy by quality mark" is a slogan that can now be applied to home buying with a real value.

**200 APPLICATIONS FOR BROADCASTING**

Over two hundred applications for broadcasting have been submitted to the Department of Marines, which department has charge of the radio service. The great majority of these will likely be held in abeyance until after the general elections, it has been intimated by department officials. Some of the more extensive projects may be authorized, but the others will have to wait.

One of the applications which may be granted very soon is one from the Canadian Pacific Railway for permission to erect three high power broadcasting stations, one in Montreal, one in Toronto and one in Western Canada, at a point to be selected later.

**LOCAL & GENERAL**

The Westerdale Young People's Sports, Wednesday, 16th July. Everybody welcome. 26 3c

"Scotty" Cathro of Bowden was renewing old acquaintances in Didsbury last week-end.

Mr. Parker Reed and family of Calgary, spent Sunday in town and visited with Mr. and Mrs. H. Pearson.

Mrs. C. Dickau received the sad news on Sunday that her nephew, George Hintz of Plymouth, Nebr., was killed in an auto accident.

Messrs. T. Johnson, J. Kirby and R. Hawkes found fishing very good at Pine Lake on Sunday and returned home with full ereels.

Mr. and Mrs. Hanlin Walsh of Olds and Mr. and Mrs. W. J. Scheidt of Didsbury, spent Friday at the D. Irwin home.

About thirty members of the local Masonic Lodge visited the King George Lodge at Calgary on Friday evening last.

The Olds School Board have awarded the contract for building their \$55,000 School to Waterman and Waterman of Edmonton. Building operations commence this week.

Mrs. A. G. Studer and Miss W. Studer are spending a few weeks at their cottage at Sylvan Lake. Miss Alice Pearson also accompanied them.

Tuesday, July 1st being a Dominion holiday, all places of business will be closed the full day but will remain open all day, Wednesday, July 2nd.

The Anglican Church are holding an open-air service and picnic at the Little Red Deer on Sunday. Those wishing to attend, are asked to meet at the Church at 10 a.m.

Mr. John Gilmour of Calgary, who supplied during the summer months of 1928 on the Zella-Westcott field for the Baptist Churches, will preach again on Sunday, July 6th at Zella, 8 p.m. and Westcott, 8 p.m. He will be glad of the opportunity of seeing his old friends again.

The Alberta Sherborn Breeders' Association intend holding a field-day and picnic at the Olds School of Agriculture on Saturday, July 5th, commencing at 11 a.m. The Hon. Geo. Hoadley, Mr. Jas. Douglas of Caledonia, Mr. Geo. E. Day and Mr. S. G. Carlyle are expected to be present. The Association will provide tea, coffee, sugar and cups.

**One-Arm Drivers Are Being Checked**

Pleading guilty to a charge of reckless driving before Magistrate G. E. Sanders in the police court Saturday morning, Charles Hood, 301 Fourteenth avenue east, was fined \$15 and costs. This charge was brought by a provincial constable who arrested Hood for driving along the Macleod Trail with his arm around a lady companion. This is one of a number of similar cases as the provincial police have started a drive to clear the highways of the one-arm driver.

In fining the accused the magistrate stated that it was a shame that the girls concerned in these cases could not be brought to trial also as they were as much to blame as the drivers.—Calgary Herald.

**LIVESTOCK SITUATION**

In its annual report on conditions in the livestock market the Dominion Livestock Branch calls particular attention to reductions in cattle output. The report states: "The sales of commercial cattle during the past five years showed every evidence of having reached a low point in the production field. During the past two years our combined sales to yards, plants and on direct export have declined below the million mark. Direct exports, however, increased by about 2,000 head and direct sales to plants by about 7,600 head." It also reports growing activity in the prairie provinces in livestock production generally, and throughout the Dominion in sheep and lamb production.

TOTAL ASSETS IN EXCESS OF \$960,000,000

Didsbury Branch: J. CLARKE, Manager

HER TENTH

In many parts of rural England tourists may see the quaint old buildings whose very stones provide sermons of bygone days, of such are the ancient Tithing Barns, into which the farmer brought his tithe of corn and produce. Red tiled and weather-beaten, they have stood the test of time, and though centuries old are mute evidences of an age when tithing was accepted as the duty of a man towards his maker.

Here and there one still meets the same spirit of unselfish sacrifice in the hearts of some men and women of kindly vision and sympathetic understanding. The following little story taken from the busy Headquarters of Red Cross in Alberta restores one's faith in humanity in these materialistic times:

The Commissioner says: "One day when more than usual the financial clouds were threatening, there came out of the grey sky a silver lining in the shape of a little note from a working woman. She said that she was poor herself, but she had lately earned a little and she wished to dedicate her tenth to Red Cross for the care of crippled children. A dollar and some cents fell out of the envelope, but far more than that in reality, for with the money there came a spirit of sacrificial service that re-dedicated our Red Cross workers afresh to their great task of mitigation of suffering, their faith strengthened by this simple story of a country woman's loving gift."

ASYLUMS TO CLAIM  
ONE OF EVERY 25  
PEOPLE IN CANADA

"One out of every 25 people in Canada will enter mental hospitals and more Canadians will become patients than will graduate from the universities of the Dominion," was the estimate used in a statement on mental hygiene by Dr. Clarence M. Hincks, director of the Canadian national hygiene committee at the first international congress on mental hygiene in Washington. He stated that the situation in Canada was by no means peculiar to this country—for example, in New York state one out of every 22 people become inmates of institutions.

Dr. Hincks' paper had reference to the education of the public with respect to the importance of mental hygiene. This had been done in the Dominion, he said, by reiteration of a few significant facts and as "mental disorders have made insidious inroads into practically every family connection in Canada. There are more occupied beds in Canadian mental hospitals than in all general hospitals; mental and nervous disorders are responsible for a greater lack of national efficiency than are physical disabilities." The speaker estimated that every case of mental disorders prevented saved the Dominion \$7,000.

Mental hygiene authorities in Canada are trying to do away with popular misconceptions in the public mind. Some of these are that mental diseases are always due to bad heredity; that all insane persons are dangerous and that insanity is incurable.

The most significant single study in mental hygiene is being carried on in Canada, stated Edwin R. Embree, president of the Julius Rosenwald Fund of Chicago, at the concluding session.

An itching skin?  
Ugly pimples?  
Red eruptions?

The active fluid DDD will wash the disease germs out of the skin. Touch a few drops to a bad spot—watch the formula penetrate. Repeat the test one, two, three times—the rough unsightly spots have disappeared.

H. W. Chambers, Druggist

"I think that the increase in unemployment has stopped in the United States and that by the time the Fall comes around, things will be much better," declared Professor Leo Wolman, of Boston, interviewed aboard S.S. Empress of Australia, on his way to the International Wage Conference at Geneva. "The worst has passed," he added, "and things are looking brighter again."

Canada's new championship golf course, the Royal York of Toronto, was opened officially May 19, in the presence of a distinguished gathering of golfers and Canadian Pacific and civic officials. George S. Lyon, Grand Old Man of Canadian golf, drove the first ball, and later in the day, the clubhouse was honored by the inspection visit of Their Excellencies, Lord and Lady Willingdon. The course is in connection with the Royal York Hotel and will be at the disposal of guests.

W. R. MacInnes, vice-president in charge of traffic, Canadian Pacific Railway, since 1918, and after 45 years' service with the company, retires May 31 at his own request, and will be succeeded by George Stephen, at present freight traffic manager. In announcing the change, E. W. Beatty, chairman and president of the railway, said:—"Mr. MacInnes has been in the company's service for forty-five years and has discharged his exacting duties as freight traffic manager and as vice-president in charge of traffic with conspicuous ability and loyalty to the company's interests. By his retirement the company loses one of its ablest and most respected officers."

More than four hundred varieties of apples have been originated at the Canadian Government Central Experimental Farm at Ottawa within the last 35 years. As thousands of seedlings have fruited, the apples have been tested and the best of them named and perpetuated for future production.

## WORLD HAPPENINGS BRIEFLY TOLD

Regina was named as the scene of the 1930 convention of the Trades and Labor Congress of Canada. The western city defeated Hamilton by 109 to 75 for the honor.

Mrs. Jessie Campbell Ewart, wife of John S. Ewart, K.C., widely known authority on constitutional law and history, died at her Ottawa residence recently.

Montreal proper has now a population of 1,071,057, according to Lovell's Montreal Directory, the 87th volume of which is about to be published. The population of Greater Montreal is 1,224,059.

Vilhjalmur Stefansson, famous Arctic explorer declares that the northern air route to Europe is the only practical one to develop and predicts that within 10 years' time there will be one day mail service from Winnipeg to London over the northern end of the world.

The Graf Zeppelin completed its 20,000 mile flight around the world in 21 days 7 hours and 34 minutes elapsed time. Actually flying time of the Graf was 11 days 23 hours and 14 minutes, beating the time of 15 days and six hours made by the United States army world flyers in 1924.

## IS THERE A BABY IN YOUR HOME

Is there a baby or young children in your home? If there is you should not be without a box of Baby's Own Tablets. Childhood ailments come quickly and means should always be at hand to promptly fight them. Baby's Own Tablets are the ideal home remedy. They regulate the bowels; sweeten the stomach; banish constipation and indigestion; break up colds and simple fevers—in fact they relieve all the minor ills of little ones. Concerning them Mrs. Mollie Cabotte, Makamik, Que., writes: "Baby's Own Tablets are the best remedy in the world for little ones. My baby suffered terribly from indigestion and vomiting, but the Tablets soon set her right and now she is in perfect health." The Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

## A Great Mathematician

Professors Amazed By Rapid Mental Calculation Of Young Russian Woman

The world's most marvellous woman mathematician has been discovered in the person of Nina Glagoliva, 22 years old, who does in her mind, in from two to 20 seconds, mathematical problems which require hours of experts to do, in the ordinary way, with pencil and paper.

This wonder woman has been discovered after a wide survey, and scientists are amazed at her lightning-like mental calculations. Before a commission consisting of Professor Kozevnikoff and Professor Chljevsky, mathematicians; Kojinsky, the engineer, and Dr. Kiseleff, a physician, Miss Glagoliva with apparently little effort, extracted the root in the ninth degree of numbers with as many as 20 digits. Squaring and cubing numbers of 9 or 10 digits seemed no harder to her than the multiplication table to ordinary humans.

Her memory is remarkable and she can repeat, having heard them only once, long lists of words in languages she does not know. The commission pronounce this woman of Russian birth, greater than Arago or other prodigies on record.

IT'S folly to suffer long from neuritis, neuralgia, or headaches when relief is swift and sure, thanks to Aspirin. For 28 years the medical profession has recommended it. It does not affect the heart. Take it for colds, rheumatism, sciatica, lumbago. Gargle it for a sore throat or tonsillitis. Proven directions for its many uses, in every package. Every drug store today has genuine Aspirin which is readily identified by the name on the box and the Bayer cross on every tablet.

Aspirin is a Trademark Registered in Canada

## Aviators Had Hard Time

Had Almost Lost Hope When Rescued In Far North

After living eight days on berries between God's Lake and Norway House, where they made a forced landing, R. Marshall and S. Harrison, Canadian Air Force aviators, are now recovering at Norway House. They were rescued by an air force plane recently when they had almost given up hope.

Their clothing was in tatters and they were painfully weak when found. They were on fire patrol when the motor stalled and landed on the lake, and struggled unsuccessfully the first day in an effort to make repairs. They remained near the machine and on the eighth day their frantic signals attracted another plane to their rescue.

Like a Grip At the Throat. For a disease that is not classed as fatal there is probably none which causes more terrible suffering than asthma. Sleep is impossible, the sufferer becomes exhausted and finally, though the attack passes, is left in unceasing dread of its return. Dr. J. D. Kellogg's Asthma Remedy is a wonderful remedial agent. It immediately relieves the restricted air passages as thousands can testify. It is sold by dealers everywhere.

## Army Fights Locusts

Sixty-Five Tons Destroyed By People In Bulgaria

Every man and woman between the ages of 16 and 80 was recently mobilized by the government of Bulgaria to fight an extraordinary plague of locusts which were destroying crops in the Hasovo District, of southern Bulgaria. Fire, smoke, lye and oil were successfully used in combating the pests, but more than 65 tons of the locusts were destroyed before their depredations were finally terminated.

Sores Flee Before It.—There are many who have been afflicted with sores and have driven them away with Dr. Thomas' Electric Oil. All similarly troubled should lose no time in applying this splendid remedy, as there is nothing like it to be had. It is cheap, but its power is in no way expressed by its low price.

France has seven million cyclists. It is the most popular sport in that country. An annual distance bike race is one of the big sporting events each year.

## Investigating New Marketing System

May Market Wheat In Europe On Basis Of Protein Content

Dr. Robert Newton, professor of field crops at the University of Alberta, has been asked by the National Research Council of Canada to make an investigation of the possible reception which would be given in Europe to a system of marketing wheat on a basis of protein content. The report will be prepared for the next session of parliament.

Suggestion that such an investigation be undertaken was made by the agricultural committee of the House of Commons last session. The announcement that the work would be done by Dr. Newton, was made by Dr. H. M. Tory, at a session of a committee of the research council here.

The report of grading of wheat by protein content, published by the research council for the committee, was approved.

## Might Be Good Idea

Everyone In Japan Compelled To Carry Identification Disc

"Where's your identification disc?" In the near future you may be stopped by a policeman and asked this question. And if you can't produce the disc, it may mean a police court summons and a fine, says a writer in Answers. This may sound far-fetched, but a coroner remarked the other day that it would be a good thing if everybody carried an identification disc of some kind, and was informed by a police officer that this was compulsory in Japan. There everyone wears such a disc around the neck from birth onwards. Apart from the convenience in accident cases, it would also be a safeguard against loss of memory, of which there have been many instances.

Martha—I thought you told me that you wouldn't give away that secret I told you last night.

Madge—I didn't give it away. I exchanged it for another one and an ice cream soda.

## Silver Dollar Out Of Date

Fifty Million In U.S. Treasury But No Demand For Them

The silver dollar has joined the horse and buggy and other remnants of the past and has faded from circulation, while the silver half-dollar is still used in the West, but is going out of use in the East, because quarters are favored for tipping, according to U.S. Treasury officials.

At the present time there are about 50,000,000 silver dollars tied up in the Treasury to back up silver certificates, although they could easily be placed in circulation if there were a demand for them.

## Keep Your Farm Up-to-Date This Inexpensive Way

### For Farm Homes

Faded or cracked walls and ceilings detract from the pleasure of farm life. Hundreds of farm owners, realizing this, have transformed their rooms into bright, colorful interiors by applying Gyproc over all the old, ugly surfaces—then decorating. Remarkably attractive results are thus achieved at small cost. Every room becomes much more beautiful, livable and up-to-date.

### Barns and Poultry Houses

Gyproc lined barns and poultry houses provide the best protection against fire, cold, heat and vermin that your stock can have. You can erect strong, rigid Gyproc sheets yourself in short time and at little expense. After a few months you will be delighted with the improved health of your cattle and the increased laying capacity of your flock.

### Utilizing Waste Space

Those musty, inaccessible waste spaces in your attic and basement! Why not convert them into extra rooms by erecting Gyproc walls and ceilings? You can have a playroom, a laundry room, a workshop, a special preserving closet or any other kind of room you wish.

For fast, economical, fire-proof construction on the farm there is nothing to equal Gyproc. Write us for information or see your nearest Gyproc dealer.

#### LUTHERAN CHURCH

Rev. C. J. A. Nissen, Pastor.

Westcott, 10:30 a.m. German.  
Didsbury 2:30 p.m. English.  
Sermon Subject: "On the highways and byways of life."

### SPADES AND PAIS

A traveller who has seen many countries and made a study of child welfare the world over was much impressed with a sight that may be seen daily in the City of Calgary in a beautiful garden, where were many children at play in happy grassy places under the shade of great fir trees. The older boys and girls were engaged in games that did not call for much movement, for one observed that their little limbs were chained in plaster casts, or limited with splints. On a rug lay a small baby with golden hair, who was evidently the pet of them all.

Across the walk was a huge pile of sand, and here were many spades and pails busily being filled and emptied in the time-honored custom of making sand-pies. The shining sand gave the children a great deal of pleasure, they seemed to enjoy holding it in their little hands and watching the grains slowly trickle through their fingers.

The brilliant June sun shone on their bronzed bodies, for these little people were taking their daily sun bath, and the healing rays, which Alberta sunshine has to a great degree, were taking effect in a rosy redness that looked healthy and wholesome.

One realised that this happy form of cure is one which can be indulged in by all children, just as much as if they were like these little people of the Red Cross Children's Hospital in Calgary. All that is necessary is a back yard or garden, a sun suit which may be made from underwear or even a swimming suit. Mothers must remember that such treatment must be carefully understood so that the child is not burned too quickly or harm may result. Write to the Red Cross, 407 Civic Block, Edmonton, for a book on Sun Treatment, free on request.

### THE B.N.A. ACT

Giving a Sketch of the History of the Canadian Constitution

"Can you tell me briefly something of the British North America Act?" writes a correspondent. It is a pertinent question, as daily we see it quoted.

The original Dominion of Canada, formed July 1, 1867, by the British North America Act, was composed of four provinces, Ontario, Quebec, Nova Scotia and New Brunswick. Manitoba became the fifth province in 1870; in 1871 British Columbia became the sixth; in 1873, Prince Edward Island became the seventh; in 1905 Alberta and Saskatchewan became the eighth and ninth provinces; Yukon became a territory in 1898 and all the rest of Canada is "The North-West Territories." The British North America Act may be termed the "written constitution" of Canada, although in Canada there is much that is unwritten in that constitution which has been defined as "the totality of the principles more or less vaguely and generally stated upon which we think the people should be governed."

There is no provision in the B.N.A. Act for amendments thereto, the reason being that when the provinces of Lower and Upper Canada were united in 1841 into the province of Canada, the old Lower Province was largely populated by French-Canadians almost all of whom were Roman Catholics and much attached to their old laws and customs; the remainder of the people of the new dominion were largely English-speaking and Protestant, in general attached to English law and customs. While the French-Canadians were willing to enter into a contract with their English-speaking brethren, they were not willing to enter into a contract which could be varied by the more English without their consent.

Still there is no difficulty in having an amendment made when desired. It is brought about in this fashion: An address to the sovereign is passed by both houses of parliament at Ottawa asking for the amendment specified. The desired amendment to the B.N.A. Act is passed by the imperial parliament as of course and without debate.

TENDERS WANTED for the interior redecoration of Zella School. Apply to Miss Grange, Harnattan.

## WORLD HAPPENINGS BRIEFLY TOLD

Dr. Charles Camsell, deputy minister at Ottawa, was chosen to head the Royal Society of Canada for the next year.

Since removing of embargo on export of precious metals in January, the amount of gold shipped from Japan totals about \$87,450,000.

Bert White, 77, leapt from an aeroplane 25,000 feet above Lancaster, California, and made a safe landing in an attempt to make a record parachute jump.

Construction of a 1,500 mile elevated electric railroad across the Sahara Desert is under discussion in Paris. The estimated cost is \$117,000,000.

William Chalmers, of Vancouver, "B.A." and "M.A." graduate of McGill University, has been awarded the Governor-General's silver medal for graduate research in chemistry.

Hon. Dr. J. H. King, Dominion Minister of Pensions and National Health, is the new president of the Canadian branch of the St. John Ambulance Association. He succeeds Senator Hewitt Bostock.

Miss Betty Carstairs has bought a whole boat building yard at Cowes, England, in order to keep secret the details of a speedboat she is building in the hope of capturing the world's speedboat title.

**The Many-Purpose Oil.** — Both in the house and stable there are scores of uses for Dr. Thomas' Electric Oil. Use it for cuts, bruises, burns, scalds, the pains of rheumatism and sciatica, sore throat and chest. Horses are liable very largely to similar ailments and mishaps as afflict mankind, and are equally amenable to the healing influence of this fine old remedy which has made thousands of firm friends during the past fifty years.

### An Unusual Request

**Deaf Woman Wills Ears To Science For Research Purposes**

In the hope that medical science can aid others by a study of her ears, deaf since childhood, Miss Abby Hosmer, 70, wealthy Chicago woman, has willed them for research purposes after she dies.

The unusual will was announced by Dr. Austin A. Hayden, at a meeting of physicians and ear specialists.

"Until medical science can have opportunity to make microscopic studies of the ears of those deafened during their lifetime, we will remain considerably in the dark as to why one out of ten persons suffers from some form of this malady," Dr. Hayden said.

At any rate the Toronto Telegram points out, there are eight young citizens of Canada who are not puzzled over what they will call the new lady senator.

## Changing Styles In Fiction

**Each Generation Has Different Idea Of What Is Interesting**

There are faint but unmistakable signs of a revulsion against the new style of war books which have been all the rage for a year past. That is as it should be, for they were neither great literature nor true to life as a rule. On the whole they were read less by grizzled veterans than by young ladies who liked being shocked by stories of strong drink and strong language at secondhand.

It was a change from what the trade called Sheik-stuff which was itself a revulsion from the Sentimental Tommy style, which was itself a novelty after strong silent men, gods in the car, and other sternly masculine types that delighted and thrilled the feminine readers of thirty years ago. So the clock of fashionable fiction goes round, and every generation worships the idols of its fathers under the delusion that they have discovered something new.

(By Annebelle Worthington).

3278

A tiered model in printed silk crepe reflects a new note in modified Princess styling, which makes it so suitable for casual daytime wear.

The tiers show a downward curving tendency at back, a clever means of lengthening the silhouette. They are finished at top with novel faille crepe silk applied band that ties in youthful bow at front.

The neckline in deep open V-shape employs the same trim for applied band. Long sleeves also gathered into cuffs of the crepe with tab ends.

Design No. 3278 comes in sizes 16, 18 years, 36, 38, 40 and 42 inches bust.

The trimming bands work out nicely cut from the dull surface in crepe satin, which is so important now in soft brown shade.

Black silk crepe, plum shade in wool crepe, tiny self-checked pattern in bottle green feather - weight woolen, tomato red crepe de chine, crepe marocain in dahlia purple and navy blue faille crepe appropriate and chic.

Pattern price 25 cents. Be sure to fill in size of pattern. Address Pattern Department.

Minard's Drives Away the Headache.

## DO YOU SUFFER FROM CONSTIPATION?

Countless remedies are advertised for constipation. Many relieve for the moment but they are habit forming and must be continued. Others contain calomel and dangerous mineral drugs, which remain in the system, settle in the joints and cause aches and pains. Some are harsh purgatives which cramp and gripe and leave a depressed after effect.

Avoid lubricating oils which only grease the intestines and encourage nature's machinery to become lazy.

A purely vegetable laxative such as Carter's Little Liver Pills, gently touches the liver, bile starts to flow, the bowels move gently, the intestines are thoroughly cleansed and constipation poisons pass away. The stomach, liver and bowels are now active and the system enjoys a real tonic effect. All druggists 25c and 75c red pkgs.

### A Peculiar Accident

When the parachute worn by a mechanic flying in an army plane was accidentally opened, the mechanic was pulled into the air, smashed against the tail of the plane, and pilot and mechanic were killed when the machine fell into the sea.

## Smothering Spells

**Couldn't Walk Far Gaped For Breath**

Mrs. T. W. Roth, Kelowna, B.C., writes:—"For over a year I was troubled with smothering spells, and it was impossible for me to walk, even a short distance, on account of having to gasp for breath. A friend told me to try

which I did, and in a short time I felt much better.

"I can now recommend them to everyone."

Price, 50c. a box at all druggists and dealers, or mailed direct on receipt of price by The T. Milburn Co., Limited, Toronto, Ont.

Pedestrians who cross the streets recklessly in Berlin are to be prosecuted. After they come out of the hospital, probably.

### Use Minard's for Rheumatism.

One of life's little ironies is found in the fact that a fifty-dollar telephone pole can so completely demolish a \$3,000 motor-car.

## Has Furnace Underground

**Novel System Used By Oklahoma Gardener To Speed Up Vegetable Growth**

The thought of growing celery, sweet potatoes, tomatoes, radishes and the like in the State of Oklahoma before winter is over, without the aid of hot-houses, seems impossible. But E. B. Johnson, local agricultural expert, has a novel system with which he is just doing that.

His method lies in the installation of a furnace heating system which keeps the winter-chilled ground at a moderate temperature until warmer weather arrives. Pipe, six inches in diameter, runs from the furnace and is placed in parallel rows, three feet apart. At one end are the furnace ovens and at the other chimneys to draw the smoke through.

The first of this series of furnace heated gardens installed by Johnson is 37 feet long and 30 feet wide with 10 large chimneys, each connected with a string of pipe.

At the front end of the garden, where the furnaces are, the heat is greater so Johnson has buried the tile 24 inches in the ground with a general incline as they approach the chimneys until at the rear they are but five inches underground.

Over this bed of seed he has placed an inch of dirt and four inches of sawdust, the latter to be removed when the weather moderates. It is only necessary to keep the fires going until the seed starts sprouting.

Johnson, through years of experience, has worked out this heating ratio almost to perfection. For a number of years he was connected with various fruit and vegetable growers in and near Rogers, Ark., and last December moved to Oklahoma to pioneer such a movement in this part of the country.

Sweet potatoes were planted by Johnson on March 17, and he expected to have small slips fully a month earlier than they can be grown otherwise. Ordinarily under local weather conditions it would be May 15 before plants as large could be raised, Johnson says.

Johnson has built up quite a name for himself as a certified seed grower throughout the southwest. He ships sweet potato plants to all parts of the United States and last year furnished a greater part of the sweet potato slips shipped into the state of Washington.

George D. Rule, state sweet potato inspector for Oklahoma, has approved Johnson's present line of work. Johnson for years has worked under the supervision of the state board of agriculture.

**BOILS GO OVERNIGHT**

"Many Boils on neck. Doctor said I was in luck. Tried 'Boils Ointment' first; boils vanished overnight." C. T. Scott. "Boils Ointment" stops pain in 1 minute; boils go in few hours. At all druggists.

### Service Becoming Popular

**Passengers Are Using Telephone On Canadian National Trains**

Since the installation of telephone service on the Canadian National trains, there has been an average of six calls a trip, between Montreal and Toronto, and in the other direction, according to W. D. Robb, vice president, in whose department the service comes. Most of them have been from the train to Montreal, Toronto, Kingston, Oshawa, Hamilton, London, and other points, one being made to Ashville, New York. Several have been made to the moving train from outside points.

Persian Balm is alluringly fragrant. Adds a charming refinement to the most finished appearance. Creates and preserves complexion of surpassing loveliness and texture. Softens and whitens the hands. Cools and dispels all irritation caused by weather conditions. Swiftly absorbed by the tissues leaving never a vestige of stickiness. A peerless toilet requisite. Invaluable to all women who care for elegance and distinction.

### Many Areas Tested

Since beginning the testing of cattle for tuberculosis in 1915, a total of 1,469,769 animals have been tested, in Canada and 14 areas declared free of the disease.

### CHAPTER XV.

"Dinner is served, ladies and gents," responded Charmian; while the doctor, throwing her an appreciative smile, arose, and with the good manners Grandma had noticed on his arrival, offered his arm to the old lady.

School opened on the fifth of September. Charmian was up early that morning, but when she came downstairs she found that her boarder had been earlier still. The fire was burning brightly and the table set.

"Hello, Miss Schoolma'am," he greeted her. "Thought you might be in a fluster this morning, and like an early start. But you needn't feel too rushed because I'm going your way right after breakfast and can give you a lift."

"I don't believe you," said Charmian severely. "I think you're just saying so to save me the walk."

"Didn't you hear the telephone ring at six o'clock?" he demanded in an injured tone. "Believe it or not, it was a bona fide call in your direction. Say! what can I do next? I'd have started the coffee, but I knew you'd suspect it wasn't right."

Charmian laughed. "You've found me out. No one's ever allowed to make my coffee. You may get the butter and cream out of the ice box, and then I'd appreciate your room more than your company. I'm excited, and likely to do some crazy thing if you divert me."

"Shall you be home at noon to see to Grandma?"

John Carter had begun taking his dinners at the hotel, and disliked them even more than Charmian suspected. Her face sobered at his question.

"That's the one cloud in my sky," she admitted. "I really can't get back; and though I'll leave everything ready in the kitchen, I hate to have her fussing around alone."

The doctor looked thoughtfully out of the window. He was to all appearances watching the Merry's Gypsy investigate an invisible mouse in the wood pile, but when he turned he said:

"Look here, Charmian, why not let me come in at noon and help? We can eat here in the kitchen, and it would be less lonely for Grandma,

wouldn't it? You can leave things half ready, and I'll do the rest. Of course there'll be days when I can't get here; but it would be better than having her eat every noon meal alone. On Saturdays and Sundays I'll go to the hotel, of course," he added. "I'm trying to lighten your work, you know, not make it harder."

The girl looked up, a grateful smile shining in her eyes and widening the pretty curve of her lips.

"What a trump you are!"

He laughed.

"Does that mean that you approve of my suggestion?"

"It does if—Would it be fair to you?" she broke off suddenly.

"Fair! You'd think it fair if you knew how I detest that hotel table! You've spoiled me completely, serving my meals as daintily as if I were an invalid. Anyhow, I like fussing 'round a kitchen. Sometimes I think I'd have been more of a success as a chef than as a doctor."

"Well," said the girl, "if you'll accept your lunch in payment for your services—"

"Charmian Davis, are you a moron?" He faced her, looking so belligerent that she had to smile. "I pay a dollar every day at that miserable joint of a hotel, and you're suggesting—"

"But you don't cook your own lunch there," she broke in seriously.

"And I shan't here. I'll merely warm up the stuff you leave, and keep that precious little old lady from being lonely. And you ask me to accept food in payment. I'm surprised!"

"But—"

"There's no 'but' about it. Look here!" The doctor indulged in a bit of lightning calculation, and continued: "We'll split the difference if it makes you happier. I'm not likely to devour more than fifty cents' worth of provisions. I'll pay you that, do any necessary cooking, and, when I don't have to hurry off (and unless my practice increases surprisingly there's no danger!), I'll wash the dishes. Thus I'll be saving fifty cents a day, which means a lot to me, and you—"

"And I shall feel like a different girl," ended Charmian as he hesitated. "Really, I've dreaded leaving Grandma alone so much. I don't know how to thank you, Doctor."

"You can do so by dropping that ridiculous habit of addressing me as Doctor. I'm forgetting that I possess a Christian name. And I've had the cheek to call you Charmian for weeks."

"Every one in Wickfield calls me Charmian," she responded. "I rather expect to be addressed that way by some of my pupils! If you had been an ordinary Mister—well, I shouldn't have kept that up, of course; but Doctor, minus the Carter, has an informal sound, you know. However, I'll reform at once, though I've no doubt Grandma will consider me unmaidenly."

She laughed—broke an egg into a blue bowl, and added: "Clear out, John. It's beyond my powers to converse intelligently with a man while I get his breakfast."

Grandma, when told of the new plan, brightened visibly.

"I don't mind owning now that I've sort of dreaded my dinners," she admitted. "Somehow the days seem long with no one to speak to, though I've no doubt the neighbors will drop in more often knowing that you're not here, dearie. Some days, when there's a lot of excitement in the street, the time goes quick enough; but it'll be something to look forward to having the doctor come home at noon."

"Thanks," he said, smiling at her across the table. "I expect we'll be a regular Darby and Joan before the winter's over!"

"No reason why we shouldn't," replied Grandma, as she dipped a toast crust in her coffee. "I don't know any young man I'd rather have around, even Jimmy Bennett, and I'm as fond of Jim as if he was my own grandson. There are even times when I hope he will be; but there's no telling."

"Why, Grandma Davis!" cried Charmian. "Whoever heard such talk—and before a stranger!"

"The doctor isn't a stranger," corrected Grandma, "and even a stranger would see that Jimmy Bennett thinks the world of you, wouldn't they, Doctor?"

John Carter, who was enjoying Charmian's confusion, replied in the affirmative, and Grandma said: "The only drawback to Jimmy is his mother. She's a good woman, but terribly exacting, and she expects her boy to do just what she says. There are times when I wonder why he doesn't kick over the traces and rebel; but he's a good son, and he sees the funny side of things, too, and that makes him interesting. Many's the time he's run in to tell me a funny story—times when he knew Charmian wasn't home, and that proves that he's got a kind heart. But he's not poetic, like Charmian, and I've sometimes wondered—"

"Really," broke in Charmian, arising. "Really," broke in Charmian, arising, "though I know it's not polite to interrupt, I must start fixing your lunch, Grandma, or be late to school on my first morning. You and the doctor can take your time, but—"

She left the room, her sentence unfinished, and Grandma said: "I guess maybe she didn't want me to talk about her and Jimmy; and she's excited, too, beginning school and all. You go out, sonny and tell her not to bother with much of a meal for us today. We'll eat the left-overs."

Charmian returned that afternoon, tired but elated. Things had gone well; and she had met Doctor Howe on the way back, and ridden in with him.

"Between the two doctors I shan't get the exercise I need," she said to Grandma. "I mustn't let myself get fat as I get old."

"Fat!" snorted the old lady. "The Davises don't put on flesh, child. They're apt to be lean and spare in their old age; and your mother's people were the same. You needn't worry about getting fleshy like Lizzie Baker. She eats too much, and she never walks if she can sit."

"Well, dearie, I'm glad things went all right on your first day. And I got along real well myself. Lizzie Baker ran over to borrow some vinegar (she was making salad dressing); and Mrs. Merry stopped in for a spool of cotton and stayed an hour. The doctor warmed up things real tasty, and we had as nice a dinner as I ever ate. He had another call just as he finished doing up the dishes; and there's been a patient at the office, too. He's feeling real encouraged. He says if things continue to go on this way he'll be getting him a wife. I dunno who he'll find 'round Wickfield unless it's you, dearie, and I wouldn't mind if it was. He's got the makings of a good husband."

Charmian sat down and laughed.

"You seem bound to marry me to some one, Grandma. Are you ashamed of an old maid granddaughter? In these days a girl thinks twice before she takes on the cares of matrimony."

### Cleaning British Library

Another seasonable observance is the beginning of the great spring-clean at the British Museum Library. The regular dusting brigade on the library staff is reinforced for the occasion by a band of outside specialists, so that in all about eighty men are kept busy. The dusting of books goes on systematically, of course, from January 1 to December 31.

The Berlin, Germany, police department has been given an outdoor gymnasium which 100 men can use at a time.

W. N. U. 1840

### Relic Of Colonial Days

Victoria Will Preserve Iron House Erected Seventy Years Ago

When sappers of the Royal Engineers came to British Columbia in 1858, to build roads in the new British colony, they built their houses of iron. The engineers either were not conversant with the durability of the country's lumber or else they desired additional protection from Indian raiders.

The old iron houses were forgotten years ago, and it was thought that the last of them had been removed until workmen engaged in clearing away old buildings to make room for additions to the government buildings at Victoria, discovered the iron structure which had served as a dwelling 70 years ago. Sills under the building were found to be in good condition. They were of timber brought out from England.

Provincial government authorities upon learning the history of the iron house, ordered it placed upon a new foundation and to be preserved as a relic of old colonial days.

### STURDY CHILDHOOD

The sturdy child—the bright, active little chap is the one everybody loves. It is only the sickly, fretful child who is not attractive. It is the birthright of every child to be sturdy and well—to be able to make every one admire him. Therefore, mothers, if yours is not attractive it's your fault, not his. He must be ailing and it is up to you to see that he gets relief—that he is given a medicine that will quickly make him well and keep him well.

Baby's Own Tablets are especially designed for infants and young children. There is nothing to equal them for correcting the irregularities of the stomach and bowels—the cause of most of the ills from which little ones suffer. The Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Teacher: "What is an island?"  
Bright Boy: "A place where the bottom of the sea sticks up through the water."

Douglas' Egyptian Liniment relieves toothache and neuralgia. Invaluable in cases of croup, sore throat and quinsy. Keep a bottle handy.

Imports of motor vehicles into China last year were more than 50 per cent. greater than in the previous 12 months.

## "Skinny! I Gained 11 Lbs. in 8 Weeks and Boy Friend"

"After trying several tonics tried Ironized Yeast. In 8 weeks gained 11 lbs., new complexion, round limbs; best of all a boy friend."  
—S. M. Salino.

Men and women are amazed at gain of 5 to 15 lbs. in 3 weeks. Ugly hollows vanish. Bony limbs round out. Sallow, blemished skin gets clear and rosy like magic. Nervousness, indigestion, constipation disappear overnight. Sound sleep. New pep from very first day.

Two great tonics in one — special weight-building Malt Yeast and strengthening Iron. Pleasant little tablets. Far stronger than unmedicated yeast. Results in 1/2 time. No yeasty taste, no gas.

Don't go round "skinny," ugly, unattractive. Get Ironized Yeast from druggist today. Feel great tomorrow. Money back from manufacturer if not delighted with results.

### Little Helps For This Week

"Though He slay me, yet will I trust in Him."—Job 13, 15.

Within the slender chalice of the hand

Hold fast what I give thee, and drop down

The fringes of those tender flowers of blue,

Thy wondering eyes; nor question, nor withstand

What I may give. Perchance my love hath planned

Some sweet surprise or test if thou be true;

What if it be a sprig of bitter rue, A strange swift summons to an unknown land,

A hurting thorn, a cross? rare gifts I know

For love to bring; but would'st thou trust me still?

Quick, dear, thine answer! "I should trust until

The hidden meaning in thy gift should show."

Ah, sweet, when God sends just such gifts to thee

Canst thou not answer Him as thou dost me?

We should see not only the hand of God, but the hand of our Heavenly Father, full of mercy and loving-kindness in all that befalls us. We should believe it to be best for us, because it is His will.

—George W. Bethune.

Baby bears are almost invariably born in the winter.

## When Pain Comes

What many people call indigestion very often means excess acid in the stomach. The stomach nerves have been over-stimulated, and food sours. The corrective is an alkali, which neutralizes acids instantly. And the best alkali known to medical science is Phillips' Milk of Magnesia. It has remained the standard with physicians in the 50 years since its invention. One spoonful of this harmless,

tasteless alkali in water will neutralize instantly many times as much acid, and the symptoms disappear at once. You will never use crude methods when once you learn the efficiency of this. Go get a small bottle to try.

Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—any drugstore.

**Be Certain of SAFETY**

**Build with Gyproc**

**FIRE** can hurl your home to destruction unless a fire-resistant material such as the new Ivory coloured Gyproc Wallboard is used in its construction.

Inexpensive, permanent, easy to apply, Gyproc Wallboard *does not burn*. It is exactly what you want for fire-safe walls, ceilings and partitions when you build, remodel or repair.

Ask your dealer today for full information on Gyproc Wallboard or send for interesting free book, "Building and Remodelling with Gyproc."

## Gum-Dipped Cords Stand the Acid Test

Even though Firestone cords are of superior strength and elasticity before they are built into Firestone Tires, they go through the Gum-Dipping process for added strength and endurance.

Gum-Dipping—exclusive to Firestone Tires—saturates and insulates every fibre of every cord in the tire. This prevents the cords from chafing against each other and eliminates internal friction and heat—the greatest enemy to tire life.

Thus Firestone Gum-Dipped Tires have double reasons for their toughness, ruggedness and unequalled mileage—by actual test they hold all world's records for mileage and endurance! Specify Firestone Gum-Dipped Tires on your car. See your nearest Firestone Dealer today.

### Burnside Notes

Mr. James McCulloch spent the week-end in Calgary.

Messrs. A. B. Arlen'son and Gus and Otto Bittner spent Saturday evening in Olds.

Mrs. Walters spent Sunday with Mr. and Mrs. Fred Thompson on the Elliott ranch.

Miss Milne of the Department of Agriculture, conducted a very successful two-days' course under the auspices of the W.I., this last week.

Don't forget the Burnside U.F.A. annual picnic on Monday, June 30. Ladies please bring baskets for a picnic-dinner. Dance at night. Sports of all kinds.

### Mountain View Notes

The annual picnic of Mountain View W.I. will be held at Community Hall on Friday, July 4th. Sports of all kinds. Ball games. Horseshoe. Big dance in the evening. Good Music.

There was a large attendance at the June meeting of the W.I. in Community Hall. Mrs. Boyce, our constituency convener was present and gave a short talk on W.I. work. Mrs. B. A. Atkinson gave a good paper on "Education and better Schools."

### Golf Tournament

The second round of the Herald Golf Championship for District No. 7, was played at Innisfail on June 18, nine Didsbury players taking part.

Low scores for the round, were—Didsbury: McDougall, 83; Huget, 87; Bellamy, 91; Cook, 94; Fisher, 95. Red Deer: Gaetz, 74; Welliver, 82. Innisfail: McKenzie, 83; Proutt, 92. Lacombe: Jackson, 87.

The standings up-to-date, are: Gaetz, 161; Welliver, 162; McDougall, 162; Huget, 165; Cook, 176.

Weather conditions made play difficult, a high wind accompanied by squalls of rain, making low scores almost impossible.

### Successful Music Pupils

At the recent examination held by the Associated Board of Royal Academy and Royal College of Music, London, England, all the pupils entered by Miss V. Thomson, L.R.A.M., were successful.

Primary Grade: Eva Brown, Oma Brown, Bessie Finlay (Honorable mention), Jean Robertson, Mary Robertson and David Spittal.

Elementary Grade: Rita Scrutton (Honorable mention), Ruth Finlay and Beatrice Hayes.

Lower Grade: Lorna Clarke and Bernice McGhee.

Advanced Grade: Janet Adam (Honorable mention).

### Marine Appointed To Supervise Flight

"Flight," the Columbia all-talking aerial drama scheduled to play at the Didsbury Opera House on Thursday, July 3rd, follows to the minutest detail the regulations and official conduct of the United States Aerial Marine Corps.

The government appointed Captain Francis E. Pierce of the United States Flying Corps at San Diego to supervise the making of the film. Pierce was primarily chosen because of his service in Nicaragua in 1928. As a sub-plot of "Flight" is the dramatization of the Sandino uprising in Nicaragua, Pierce seemed the ideal choice. His experiences in Nicaragua coincide exactly with situations in the story. Pierce felt as though he was living over his Nicaraguan experience, as the technical details of "Flight" the difficulties encountered by the actors, director and working crew were not vastly different from the conditions he encountered in service.

The battle scenes of the film that Pierce supervised are the most gigantic ever undertaken in motion pictures. For sheer realism nothing has approached them. Jack Holt, Lila Lee and Ralph Graves are the leading players. Frank R. Capra directed.

The Alberta Institute of Co-operation is the only big thing of it's kind in Canada

Accommodation for camping privileges on the campus at the School for those who wish to use their own camping outfit.

### "Lady of Snows" Gets Hot

Rudyard Kipling, poet of Empire and incidentally coiner of the phrase "Our Lady of the Snows" as a description of Canada, has now another view of the Dominion. Making a flying trip to this country he struck Montreal in the middle of a heat wave that boosted the thermometer into the nineties and made the poet wonder how he ever got the idea that Canada was

a land of snow and ice. "My chief impression of Canada, judged by the past few days, is heat," he said, interviewed on board S.S. "Duchess of Bedford," on which he is returning to England. Cut is reproduction of a crayon sketch of Mr. Kipling from the gifted pencil of Kathleen Shackleton, Canadian artist of high repute. (Copyright 1930, by Canadian Pacific Railway).
